**MEDICAL FOOTWEAR**

**DrLuigi**<sup>®</sup>

Dr.Luigi products have the certificates:

1. Certificat de confort num.CE 223-0002/08, 93/42/EEC-Medical Device directive (MDD)
2. Certificat ISO 9001:2000 pour les chaussures médicalisées
3. Certificat ISO 13485:2003 pour la production et la gestion, le signe de „CE“ qualité.

Medical footwear Dr.Luigi is made of natural materials (cotton, leather) with a sole made of polyurethane. All of the materials are ecologically accepted by the standards of the EU. Our footwear is light, soft, anatomically shaped, and the elastic, polyurethane sole is adapted to every foot. Dr.Luigi medical footwear is made for all age groups, providing with extreme comfort and prevention the healthy ones and persons who are having problems with: joints, bones, spine, circulation, varicose veins, arthritis, osteoporosis, diabetes, obesity. Wearing Dr.Luigi products alleviates biomechanical and medical issues, improves blood circulation and has calming effects on physical and psychical state of the user.

All of the materials are health harmless, in accordance with the EN directive 89/686, chemically and technically in accordance with the ENISO 20347/04.

Dear Madam, Sir,

*Dr.Luigi d.o.o., Croatia* is an exclusive manufacturer of a medical footwear brand *Dr.Luigi*. Our products are sold exclusively in pharmacies, drugstores and medical shops in 25 European countries and in over than 60000 pharmacies.

Dr.Luigi medical footwear has got the certificates:

- 1.Certificate of conformity br. CE 223 – 0002 / 08 , 93 / 42 / EEC – Medical device direktive ( MDD )
  - 2.Certificate ISO 9001 : 2000 for medical footwear
  - 3.Certificate ISO 13485 : 2003 for manufacturing and management
- and a CE mark for quality.

Medical footwear Dr.Luigi is made of natural materials (cotton, leather) with a sole made of polyurethane. All of the materials are ecologically accepted by the standards of the EU. Our footwear is light, soft, anatomically shaped, and the elastic, polyurethane sole is adapted to every foot. Dr.Luigi medical footwear is made for all age groups, providing with extreme comfort and prevention the healthy ones and persons who are having problems with following:

- Joints, bones and spine
- Circulation and varicose veins
- Arthritis
- Osteoporosis
- Diabetes
- Obesity

Wearing Dr.Luigi products alleviates biomechanical and medical issues, improves blood circulation and has calming effects on physical and psychical state of the user. All of the materials are soft, elastic, light, adaptable to the shape of the foot, providing the free movement.

Medical footwear Dr.Luigi is designed for all day use indoors and outdoors. It is not designed for aggressive weather conditions.

All of the materials are health harmless, in accordance with the EN directive 89/686, chemically and technically in accordance with the ENISO 20347/04. The sole is designed anatomically so it takes over the energy of the bodyweight and the dynamics of the body (“shock-absorber”) according to the ENISO 20347/04.

The collaboration is made directly with every pharmacy by phone, e-mail or fax. We receive orders daily from 8pm to 16pm. The orders are unlimited in quantity (min.5 pairs), size and colour. Your orders are executed fast by daily delivery straight to your door, without any additional expenses. The invoice can be paid within 30 days after receiving the merchandise. The collaboration can be achieved very easily and we recommend you that the first order for smaller pharmacies is 10-15 pairs, and 25-30 for bigger pharmacies.

We look forward to our future collaboration.

Best regards,

Morana Midžić  
commercialist

## Catalog

### A. For Children

#### Model: PU-04-01-TP

This model is adjusted for child motorics, ensuring proper development and formation of children's feet.

Materials - all materials that come in direct contact with skin are 100% natural.

The sole is light, soft and elastic. It is innocuous for health and ecologically acceptable, in accordance with EN Directive 89/169 and ENISO 20347/04 norm.

This model is also certified with Certificate of Conformity: CE 223-0002/08, 93/42/EEC - Medical Device Directive (MDD) for medical footwear.

**Available sizes:** 22, 24, 26, 28, 30, 32, 34

**Price:**

#### Model: PU-04-02-TP

The characteristic of 04-02 is that they close with a burdock.

**Available sizes:** 22, 24, 26, 28, 30, 32, 34

**Price:**

#### Model: PU-04-03-TP

The characteristic of 04-03 is that they close with a zipper.

**Available sizes:** 22, 24, 26, 28, 30, 32, 34

**Price:**

## B. For Women

### Model: PU-01-01-TF

The softness and ergonomics of the sole facilitate its adjustment to the shape of the foot, allowing the amortization of bodyweight ("shock-absorber") and enabling normal circular blood flow.

The construction of the sole ensures relief of pressure from the spine and joints, causing the feeling of ease and comfort with calming effects on user's physical and psychological state. This model can be customized with "Calcar Calccanei" (circular perforation on the heel, helps relieve pain from plantar fasciitis).

Materials - all materials that come in direct contact with skin are 100% natural.

The sole is light, soft and elastic. It is innocuous for health and ecologically acceptable, in accordance with EN Directive 89/169 and ENISO 20347/04 norm.

**Available sizes:** 36, 37, 38, 39, 40, 41, 42

**Price:**

### Model: PU-01-02-TP

This model is recommended as a prevention for persons with working or genetic predisposition for development of various foot/leg conditions.

The softness and ergonomics of the sole facilitate its adjustment to the shape of the foot, allowing the amortization of bodyweight ("shock-absorber") and enabling normal circular blood flow. The construction of the sole ensures relief of pressure from the spine and joints, causing the feeling of ease and comfort with calming effects on user's physical and psychological state.
